PROFESSIONAL SUMMARY

I'm a full-stack software engineer and final-year Computer Engineering student at Addis Ababa University. I've shipped production code to real users across companies, independently built five substantial projects across Flutter, React, Next.js, Node.js, and Firebase, and represented Ethiopia as an International Finalist at the 6th International Olympiad on Financial Security in Krasnoyarsk, Russia. I care about clean architecture and products that hold up under real-world load.

EDUCATION

Addis Ababa University — Addis Ababa, Ethiopia

Bachelor of Science in Computer Engineering — Expected June 2027

- CGPA: Above 3.5 / 4.0
- Relevant Coursework: Database Systems, Data Structures & Algorithms, Computer and Network Security, Data Communication and Computer Networks, Software Engineering, Computer Architecture and Organization, Microcomputer and Interfacing, Digital Signal Processing

HONORS & AWARDS

6th International Olympiad on Financial Security — Krasnoyarsk, Russia

International Finalist – Representing Ethiopia — September 2026 – October 2026

View Certificate

- Selected to represent Ethiopia on the international stage at Siberian Federal University, competing against ~700 school and university students from 40+ countries in advanced financial security, cryptography, and risk analysis challenges.

African Robotics Championship — Addis Ababa, Ethiopia

Team Winner — Team Roha — March 2025

View Certificate

- Won a robotics championship organized by Ethio Robo Robotics as part of Team Roha, applying engineering problem-solving, embedded systems thinking, and collaborative teamwork under competitive conditions.

PROFESSIONAL EXPERIENCE

Octovate Technologies — Addis Ababa, Ethiopia

Full Stack Developer Intern — March 2026 – July 2026

- Worked as part of the Octovate engineering team on Tef-Tef, a live cross-platform freelance marketplace, contributing across the React web frontend, Flutter mobile app, and Node.js/TypeScript backend in a professional production environment.

Space Science and Geospatial Institute — Addis Ababa, Ethiopia

Team Lead — September 2026 – Present

- Leading a team on a geodesy project at Ethiopia's national space and geospatial institute, working on Earth measurement and geospatial data systems.

Ethiopian Youth Council — Addis Ababa, Ethiopia

Full-Stack Developer / Lead Frontend Developer — April 2026 – June 2026

- Led frontend development of a bilingual civic engagement platform for regional youth councils across Ethiopia, implementing an interactive SVG-based map, role-based content management system (CMS) with rich-text editing, and Zod-validated forms for managing news, events, and activity logs.

TECHNICAL PROJECTS

Restaurant Operations Management System (ROMS) — Addis Ababa, Ethiopia

Lead / Independent Flutter Developer — June 2026 – Present

github.com/betsebaygetahun/roms_app

- A full restaurant operations platform with 5 role-based interfaces (Admin, Manager, Waiter, KDS, Cashier) managing orders, billing, table allocation, and tax computation for a live commercial environment.
- Built with Flutter 3, Firebase Firestore, Riverpod 2, Clean Architecture, and fpdart for functional error handling.

Ethiopian Youth Council Platform — Addis Ababa, Ethiopia

Full-Stack / Lead Frontend Developer – Team Project — April 2026 – June 2026

Confidential Government Project

- A bilingual (Amharic/English) civic platform serving regional youth councils across Ethiopia, featuring an interactive map, news and event management, and a role-gated CMS.

- Built with Next.js 16, React 19, TypeScript, Tiptap, Framer Motion, Zod, and Tailwind CSS.

Tef-Tef Freelance Marketplace Platform Addis Ababa, Ethiopia
Full-Stack Developer – Team Project March 2026 – June 2026
teftef.io

- A cross-platform freelance marketplace connecting Ethiopian freelancers and employers, with real-time chat, in-app payments, and proposal notifications.
- Built with React, Flutter, Node.js, TypeScript, Socket.IO, Chapa API, and JWT + Google OAuth2 authentication.

Dinkenesh Event Management System (DEMS) Addis Ababa, Ethiopia
Full-Stack Developer – Team Project July 2026 – August 2026
github.com/Estifanos58/Dinkenesh-Event-Management-System

- A full event lifecycle platform covering event creation, ticketing, QR-based gate scanning, and organizer payouts with a 4-role permission system.
- Built with React 19, Vite, Express 5, Prisma ORM, PostgreSQL, and jsQR for QR code scanning.

VoiceGuard – Real-Time AI Voice Scam & Deepfake Detector Addis Ababa, Ethiopia
AI & Full-Stack Developer August 2026 – September 2026
github.com/betsebaygetahun/VoiceGuard

- A real-time AI tool that detects voice cloning and deepfake audio on live calls, flagging social engineering patterns within a sub-6-second latency window.
- Built with Deepgram nova-3 STT, Resemble AI DETECT-3B, Google Gemini Multimodal Audio API, and the Web Audio API.

TECHNICAL SKILLS

Languages:
- JavaScript, TypeScript, Python, Java, Dart, Kotlin, HTML5/CSS3

Frontend Frameworks:
- React 19, Next.js 16 (App Router, RSC)
- Vue.js, Vite, Tailwind CSS v4
- shadcn/ui, Radix UI, Framer Motion
- Lucide Icons, next-themes, next-intl

Mobile Development:
- Flutter 3 (Web & Mobile)
- React Native
- Riverpod 2, BLoC, GoRouter 14
- Flutter ScreenUtil, Dio, GetIt

Architecture & Patterns:
- Clean Architecture, MVVM
- Repository Pattern, Dependency Injection
- Functional Programming (fpdart)
- Microservices, RESTful API Design

Tools & Practices:
- Git / GitHub
- GitHub Actions (CI/CD)
- Agile / Scrum, Jira
- Figma, Postman, Docker
- Linux / Bash, VS Code, IntelliJ IDEA
- Linting & Static Analysis

Backend & APIs:
- Node.js, Express.js / Express 5
- Socket.IO (WebSockets), GraphQL
- Streaming Architectures, Multer
- PDFKit, Zod, React Hook Form
- Tiptap WYSIWYG Editor

Databases & Storage:
- Firebase Firestore (Atomic Transactions)
- PostgreSQL, MySQL, MongoDB, Redis
- Prisma ORM 7, Mongoose
- SharedPreferences, Flutter Secure Storage

Cloud & DevOps:
- Firebase (Auth, FCM, Storage, Crashlytics)
- Vercel, Cloudinary API
- NextAuth / JWT, Google OAuth2
- Apple Sign-In, Chapa API (ETB)
- Dynamic SEO Sitemaps & Metadata

AI & Audio Processing:
- Deepgram API (nova-3 Streaming STT)
- Resemble AI (DETECT-3B)
- Google Gemini Multimodal Audio API
- Web Audio API, Score Fusion Algorithms

Special Interests:
- Distributed systems & system design
- Cybersecurity & deepfake detection
- Cloud computing & enterprise apps
- UI/UX design, DevOps & CI/CD

LANGUAGES

Native: Amharic
Professional: English
